

You can make beautiful, photo-realistic rendering of your SketchUp model without the pain and frustration of learning a complex program. SU Podium runs completely inside SketchUp from start to finish. It uses SketchUp features such as textures and shadows to achieve impressive results. SU Podium is intuitive to SketchUp users. Plus, its simple interface cuts the learning curve to minutes instead of months.

- Works inside SketchUp 8, 2018, Make or Pro, Mac or Windows
- Works with SketchUp textures, sky, background colors, shadows, groups and layers
- Material properties applied globally to SketchUp textures
- Automatic material properties for SketchUp standard materials - "render right out of the box"
- High quality photon mapping/ raytracing engine
- Advanced Global illumination - 2nd to none
- Physical sky with depth and turbidity
- Bump mapping
- 'True' reflection - not fake specularly
- Refraction
- Blurred reflection
- Blurred refraction for true translucency
- Light emitting materials
- Various light source : Omni, Spot, Sun, Sky
- Caustic reflections
- Support for color in translucent material
- Unlimited resolution
- Multi-processor support
- SU Podium Browser Free library comes with hundreds of ready made light fixtures and textures
- Creates 360/180 degrees Panorama-VR rendering
- No cast shadow option for specific material
- Podium Image Editor to enhance rendering results
- 64 bit support for both Windows and Mac

Why Podium ?

- Very easy to use, beginner will feel like a pro.
- Faster than any other rendering plugins.
- License price is cheaper, almost 1/4 than most popular plugin.
- Render ready component available, Podium Browser.
- Amazing photorealistic results, see by yourself <http://supodium.zenfolio.com>

Podium Browser

Bring your SketchUp Scenes to life with render-ready content

Click, Pick, Render with SU Podium. No need to setting your material and lighting fixture.

- Web-based, Windows or Mac
